John D. Baker

000-000-0000 (preferred) 000-000-0001 (alternate) bogus@bogus.com http://bakerjd99.wordpress.com/ my email is the *re*ciprocal of e or 1/e to nine decimal places

What I do

I am a Cognos consultant with extensive planning and BI experience. I also have a strong programming and developer background with a focus on financial forecasting and marketing systems. I am used to directing teams and working independently.

I have worked with many major planning, OLAP, SQL database and reporting systems, e.g., Cognos Planning, Cognos Analysis and Report Studios, Cognos Powerplay, TM1, Microsoft Analysis Services, SQL Server 2000-2008, Oracle and DB2. I am familiar with OLAP dimensional modeling, (particularly Cognos Framework Manager), and SQL database design and normalization practices. My SQL programming skills are current and I am familiar with ETL tools like Cognos Datamanager, (Decision Stream), and Transformer.

In addition to standard planning software I have developed specialized software tools that go beyond the facilities provided by vendors. Of particular interest is my graphviz based tool that analyzes the structure of analyst/contributor models and generates planning model diagrams.

I am a skilled communicator with a history of writing detailed technical documents and giving customer presentations.

Citizenship

Dual American and Canadian able to work in either the US or Canada.

Work Summary

Position	Software	Years
Cognos Planning Analyst	Cognos 8.4 Planning, Analysis Studio, SQL Server 2005-2008, Framework Manager, C#, J	2008-2010
Senior Cognos Consultant	Cognos 8/7, Cognos 8 Planning, Report Studio, SQL Server 2005, Datamanager, Transformer, TM1, Framework Manager, C#	2007-2008
Cognos Consultant	Cognos Planning 7/8, SQL Server 2003-2005, J	2006-2007
Software Engineer	Visual Studio 6 & 7, C++/STL, VB, Dyalog APL, J, SQL Server 2000-2005, JAVA, MDX, XML	2001-2006
Senior Developer	Dyalog APL, VB, XML, SQL, J, Mathematica	1999-2001
APL Consultant	SHARP APL, APL2, AFM, TSO/MVS	1997-1999
Programmer Analyst	Powerbuilder, Oracle, DB2, SAS	1995-1997
Systems Analyst	SHARP APL, Novell, FoxPro, Sybase	1992-1995

Work Experience

Cognos Planning Analyst

Dummy Corporation

Fort Wayne, IN

December 2008 - August 2010

At Dummy Corporation I was the senior Cognos resource involved in implementing, operating and maintaining a large company wide Cognos 8.4 sales forecasting system. After a six month implementation period I managed this system for 18 months. This system is a medium to large planning system that consists six contributor applications and extensive supporting SQL.

In addition to the sales forecasting system I was also responsible for implementing and maintaining the Finance department's Cognos 8.4 expenses forecasting system. This application had some unique output requirements that I solved with a C# program that extracted information from published contributor databases and transformed it into JDE (J. D. Edwards) oriented ETL files.

Senior Cognos Consultant

Irvine, CA

CBH Consulting

July 2007 - October 2008

At CBH I worked on Cognos 8 Planning & Contributor implementations servicing clients in the greater Los Angeles and San Diego areas. In addition to planning I worked on BI Reporting, SQL projects and TM1, tasks. Typical client projects were:

- Developing Report Studio reports and tutoring users at a large Los Angeles commercial realestate firm.
- Implementing complete Cognos 8 planning, budgeting and forecasting systems at firms in San Diego and Irvine.
- Modifying BI Datamanager Transformer cube builds at a number of firms including a large multinational studio.
- Supporting other consultants on many planning/BI projects with clients ranging from large waste processing firms to municipalities.

Cognos Consultant

Ottawa, ON

Self Employed

2006 - June 2007

For six months I worked as an independent Cognos consultant serving clients in Hamilton Bermuda and Itasca Illinois.

- At AWAC (Allied World Assurance Corporation) in Hamilton I consulted on upgrading dozens of Cognos 7.2 planning models to 7.3 and 8.x systems.
- In Itasca I merged user name spaces to simplify Cognos contributor security.

Minneapolis MN, Ottawa ON 2001 - 2006

Adaytum/Cognos

At Adaytum/Cognos I was a software developer working on the Analyst/Contributor components of the Cognos Planning system. I contributed to planning's capabilities by writing software that:

- Generated OLAP hierarchies from Analyst's internal mathematical formulas. This work resulted in a Cognos patent award.
- Pioneering the first planning extension to test the contributor extension framework.
- Coding new Analyst financial built in functions (BIFS).
- Improving Analyst's file system for the Cognos 8 release of planning.
- Developing a Framework Manager/Analyst prototype for using FM dimension metadata in Analyst.
- Designing a detailed XML based query and data movement language to convert contributor XML data blobs to a more usable form. The technical specification document for this language was typeset in the mathematically oriented $\text{MT-X} 2_{\mathcal{E}}$ typesetting system.

Senior DeveloperToronto, ONAdaytum1999 - 2001

I worked with a team of developers on the ePlanning system. I specialized in adding new data import facilities that:

- Mapped Microsoft OLAP dimensions to Analyst mathematical dimensions.
- ePlanning DCUBES to Microsoft OLAP Analysis Services.
- SQL stored procedures.

I also made many troubleshooting and service trips to customer sites all over North America.

APL Consultant

Toronto ON, Dallas TX

Self Employed

1997 - 1999

As a chief Y2K test consultant I developed and ran extensive year 2000 millennium compliance tests on Reuters large SHARP APL based financial and economic database systems.

I also rewrote and optimized a number of key Blue Cross and Blue Shield APL2/AFM risk categorization systems maintained by the Statistical Control Department. A significant part of this work was year 2000 related.

Programmer Analyst

Ontario Ministry of Health

Kingston, ON 1995 - 1996

At the Ministry of Health I worked with a team that was building the first Ontario medical corporate providers database. This high profile DB2 database provided a more accurate and current view of medical providers in Ontario. I also worked on data integrity and user interface issues using Powerbuilder, SAS and Oracle.

Senior Systems Analyst

Syracuse, NY

Niagara Mohawk Power Corporation

1992 - 1995

Niagara Mohawk is a large electric and gas utility company with over 1.5 million customers. As a Senior Systems Analyst I played a key role in the transition from mainframe SHARP APL software to Windows, OS/2, Novell, FoxPro and Sybase client/server systems.

Positions held before 1992

System Manager, Queen's University, Kingston Ontario

Project Leader, Rivera Hartling Systems, Kingston Ontario

Technical Consultant, I.P. Sharp Associates, Calgary Alberta.

Mathematics Teacher, Ghana Secondary School, Tamale Ghana.

Education

Computing Science 1981-1983, University of Alberta, Edmonton Alberta

B.Sc. Mathematics 1974, University of Alberta, Edmonton Alberta
